Project Overview

PROJECT DESCRIPTION

This project is about exploring the potential of the K-Pop market for a Spanish record label. The goal is to analyze a database of K-Pop artists spanning from 1992 to 2020 to uncover trends and identify successful groups that could perform well on tours in Spain and Latin America.

MAIN OBJECTIVES

- 1. Discover New Talents:** Identify emerging K-Pop groups with similar characteristics to past successful artists.
- 2. Plan a Summer Festival:** Design a lineup for a summer festival featuring multiple K-Pop groups to boost the genre's popularity in Spain and Latin America.

Business Questions

Business Strategies

Discovering New Talent

Focus on scouting idols born in **Seoul** or internationally, particularly in **China** and **Japan**, where talent is growing. Form groups with around **5 members and maintain gender diversity** in group compositions to align with the current industry balance.

Festival Planning

Prioritize artists with a high number of successful videos, such as **FTISLAND**, **Super Junior**, and **T-ARA**, to maximize festival appeal. Schedule performances and video releases around peak months and successful years, especially **January** and **December**, for strategic timing and maximum audience engagement.

Stage Selection: Prioritize hosting the festival at the most common stages, like **Jisoo**, in **South Korea**. This location aligns with the concentration of talent and offers strategic advantages for audience draw and cultural resonance.
